Statement for Matter 3: Approach to Allocations in the Green Belt (Respondent Ref: REP/300)

Prepared for West Hall Estate Company Ltd. (November 2019)

#### 1. Introduction

- 1.1 This hearing statement has been prepared by Strutt & Parker on behalf of our client, West Hall Estate Company Ltd., who have land allocated by the Council in the proposed draft Site Allocations Development Plan Document (SADPD) with specific reference to site GB10 Land surrounding West Hall, Parvis Road, West Byfleet, KT14 6EY.
- 1.2 We confirm that our client owns the site, identified in draft policy GB10, and has done so since 1958. The site is available, deliverable and development in general accordance with draft Policy GB10 is achievable within the suggested timeframe. Therefore, this site would significantly contribute to meeting the housing (both market and affordable) needs of the Borough, some of which could come forward within the first 5-year period of the new Local Plan.
- 1.3 We confirm that our client has engaged fully with the Local Plan process stretching back to 2014. The comments set out below are in response to the Inspector's Matters, Issues and Questions ahead of the Hearings. These comments should be read in conjunction with the issues raised by us at the Reg. 19 stage which also included a detailed vision document to show how the site could be developed in line with the draft allocation and our suggested modifications. Our client has been approached by several national and regional housebuilders over the past few years, all of which are keen to develop the site for housing along the lines suggested in the draft policy. We provide documentary evidence of this **at Appendix A**.
- 1.4 This statement specifically responds to the Inspector's Matter 3: Is the SADPD's approach to allocations and safeguarded land in the Green Belt justified and consistent with national policy?

Issue (ii) Do the SADPD's GB allocations and policies accord with national policies and guidance, and do exceptional circumstances exist sufficient to justify the alteration of the GB's boundaries?

- 8. Does the SADPD set out ways in which the impact of removing land from the GB can be offset through compensatory improvements to the environmental quality and accessibility of the remaining GB land, and how such improvements could be secured?
- 1.5 As part of our client's submission, and through the provisions of draft Policy GB10, our submitted vision document for the site shows how the site could be developed including compensatory improvements within the allocation. In particular, the potential to secure the long-term woodland and wildlife management of those undeveloped areas. In addition, the development of the site could secure public access, which currently is unavailable. The draft masterplan demonstrates the way in which existing footpaths would be incorporated into the overall vision for the site and new public

connections established especially to the north to allow north-south and east-west permeability through and beyond the site. These public access routes would also link into the wider SANG land proposed by the Council to the south and east of the draft allocation.

#### Issue (iii) Are the GB housing allocations deliverable or developable?

- 2. To what extent would housing allocations in the GB anticipated to come forward in the next 5 years be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years?
- 1.6 The site is available now and is a suitable and sustainable location for housing. The vision document demonstrates that an attractive landscape-led scheme could come forward subject to securing the allocation and relevant planning permissions. In respect of the timing of release of GB sites, we refer the Inspector to our comments under paragraphs 3.9 to 3.14 of our Reg. 19 submission.
  - 3. For GB allocations scheduled later in the plan period, are these in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged?
- 1.7 As highlighted at paragraph 3.1 of our Reg. 19 submission, the Council has identified the site lies within a highly sustainable location on the edge of the existing residential area forming the current urban edge to West Byfleet, with its associated services and facilities. The site can deliver much needed new housing (both market and affordable housing) within a sensitively designed and strong landscape environment. In addition, the Sustainability Appraisal (SA) that forms part of the evidence base that underpins the draft Site Allocations DPD carefully considers the reasonable alternatives for delivering housing and employment across the District, including the alternatives to releasing land currently within the green belt. In our view, the SA has fully considered the likely significant effects on the environment, economic and social factors as required by the NPPF.
- 1.8 At every stage of the Plan process, our client has highlighted to the Council that the site is available immediately with no significant constraints (i.e. contamination, access, ecology etc.) across the site. The proposed allocation would allow a viable scheme to come forward including the delivery of policy compliant affordable housing. The client has been approached by several national and regional housebuilders who are very keen to develop out the site for housing. In our opinion, there are no physical, environmental or economic/commercial considerations that would affect the deliverability of this site for housing.

- 4. Policy GB10 of the SADPD relates to a site that is within a Mineral Safeguarding Area. The reasoned justification to Policy GB10 indicates that borehole testing of the site would be necessary, which may then lead to the full investigation of whether any reserves could be worked prior to any development that could sterilise those reserves. How have the implications of this informed the phasing and delivery assumptions of GB10?
- 1.9 As part of site investigations to inform the draft masterplan/vision, the allocation was subject to a minerals assessment in 2004/05. At **Appendix B**, we provide a summary letter from our technical advisers, Matthews and Son, which summarises the current position as follows:

'The lack of interest in the deposit at that time [2004/05] was clear evidence of the uneconomic nature of the deposit and in my view this mineral remains equally uneconomic to this day and is simply too small and has too many associated geological problems to be a commercially workable prospect'.

- 1.10 It is clear from the summary letter that the site does not contain sufficiently viable amount of minerals that would preclude its development for housing. Any minerals found could be removed and/or used in connection with the sites development.
  - 5. How has the 14.8ha figure for residential development on the GB10 site been arrived at, and does the figure include the proposed traveller pitch provision?
- 1.11 We refer the Inspector to our representations under Reg.19, and in particular, paragraphs 3.3 to 3.7 under which we also query how the Council has arrived at the residential development area. As part of the Reg. 19 submission, we have suggested a number of modifications to ensure the draft policy is justified, effective and consistent with national policy, in particular with paragraph 117 of the NPPF.

Issue (iv) Are the SADP's policies relating to Traveller Sites consistent with the Core Strategy, national policies and guidance?

- 1. Has the allocation of sites for Traveller accommodation and transit pitch provision followed the sequential approach set out within Policy CS14 of the Core Strategy?
- 1.12 The requirement to provide 15 traveller pitches (within the draft GB10 allocation) is a very recent addition and one that was not discussed with our client prior to the submission of the draft Plan to the Secretary of State. This late insertion in to the draft policy raises a number of issues: 1) who would deliver the site?, 2) Who would own and maintain the site, 3) Possible impact on the commercial viability/attractiveness of the residential scheme and 4) Potential for conflict along single access road and impact upon woodland areas from paraphernalia connected with the traveller site.

- 1.13 We set out our comments on this aspect of the draft policy at paragraphs 3.15 to 3.38 of our Reg. 19 submission. In addition, we include a technical assessment prepared by our consultants (see Appendix C), Tyler Grange, which has reviewed alternative locations taking into consideration Government advice contained in Traveller Sites dated August 2015 (as appended to our Reg. 19 submission). The technical assessment concludes that there are other sites that could accommodate the traveller pitches including the following:
  - Land at Ten Acre Farm.
  - Land South and North of Murrays Lane (Boyds Farm).
  - Land north of Saunders Lane.
  - Land at New Lane, Sutton Green.
  - Five Acres Farm.
- 1.14 We believe that the Council has not provided a reasonable and considered justification as to why these sites are not appropriate. In respect of land north of Murray Lane (Boyds farm ref: PLAN/2018/0940), this was not even assessed by the Council though there is an appeal pending for 'Change of use of land to 2 No. Gypsy / Traveller pitches including 2 No. mobile homes, 2 No. semi-detached dayrooms, 1 No. package treatment plant, 2 No. touring caravans, hardstanding, and associated works'. Whilst I appreciate the Council may have taken the view to discount this site due to the outcome of the application, it nevertheless, should have been assessed as part of the Council's Traveller Assessment. The Council may have come to a different conclusion based upon the strategic overview being taken to inform the Local Plan process which is quite distinct to the assessment of an ad-hoc planning application. The application is currently at appeal.
- 1.15 In addition to the above sites, we highlighted in our Reg. 19 submission (paragraph 3.33) other Green Belt sites also allocated for development or safeguarded for future development that have not been allocated any traveller pitches, including:
  - Land south of Parvis Road and High Road, Byfleet (Policy GB4, 5.83ha);
  - Land to the south of Rectory Lane, Byfleet, (Policy GB5, 4.40ha);
  - Nursery Land adjacent to Egley Road, Mayford (Policy GB7, 18.65ha); and
  - Woking Garden Centre, Egley Road, Mayford (Policy GB8, 1.62ha).
- 1.16 The Council has provided very little justification as to why the 15 traveller pitches (70% of the overall provision) is required to be provided on the West Hall site, other than a comment about spatial distribution, which is not considered relevant. If the Inspector considers these alternative locations are not appropriate, then we propose the traveller pitches be located on land adjacent to GB10 (also owned by our client), which would help to alleviate/remove some of the concerns listed under 1.12 above, and allow for a comprehensive masterplan to be delivered at West Hall without the need to carve out an area solely for traveller pitches. As set out in the TG document (Appendix C paragraph 3.23), this alternative site could also deliver ecological/biodiversity compensatory enhancement measures as a result of

land being removed from the Green Belt in line with the advice in paragraph 138 of the NPPF.

- 2. What evidence is there to support the statement in the Council's Regulation 19 Consultation Issues and Matters Topic Paper that use of sites in the urban area to meet the needs of Travellers is unlikely to be viable?
- 1.17 We do not believe that the Council has fully explored the possibility of accommodating traveller pitches close to urban areas where the extent and range of facilities and services are at their greatest. This is evidenced by the Council's response at paragraph 3.6 of the Council's Summary and Response to Reg. 19 Consultation document dated June 2019 (ref: WBC/SA/003). This brief explanation is neither detailed nor robust and/or credible.
  - 4 What factors have been taken into account to inform the SADPD's spatial distribution of Traveller sites?
- 1.18 The Council claims to have found no suitable or viable sites within or adjacent to the urban area outside the Green Belt from an assessment of sites included in the Council's Strategic Housing Land Availability Assessment, however it has provided no details of which specific sites within or adjacent to the urban area were assessed as part of this exercise or the reasons why these sites were discounted.
- 1.19 This has resulted in the Council identifying the opportunity to provide 15 traveller pitches on an area of around 1.2 hectares at West Hall, within the Green Belt (nearly 70% of the overall need).
- 1.20 The Council states in its report to Council on 18th October 2018 that these proposals "will strike a good balance in the geographical distribution of pitches across the Borough" and are "in general conformity" with national guidance, following the "general principle for Travellers accommodation to be met where possible as an integral part of large allocated housing sites" (paragraph 3.3).
- 1.21 Taking these assertions in turn and notwithstanding the fact that there are no current or proposed traveller sites in the north of the Borough, it is our view that there is no reason why traveller pitches should be geographically dispersed across the Borough. There is no requirement in national policy for sites to be dispersed across local authorities' administrative areas and it is our view that either intensification or expansion of current sites within the Borough would be the most appropriate location for new pitches, in line with the Government's aims in Planning Policy for Traveller Sites.
- 1.22 Moreover, the Council has also provided no evidence as to why the West Hall site is its preferred location for accommodating these 15 pitches ahead of other sites within the Green Belt including those that the Council is proposing releasing from the Green Belt or safeguarding through the Site Allocations DPD.

1.23 We refer the Inspector to our comments under paragraphs 3.34 to 3.38 of our Reg. 19 submission.

#### **Summary**

- 1.24 On behalf of our client, we support the Site Allocations DPD (and the supporting evidence) as it fully justifies the proposed spatial housing strategy which includes the need to release green belt land to positively meet its housing and other economic priorities for the Plan period and beyond.
- 1.25 Notwithstanding the above, we feel that overall the Plan is currently unsound, but could be made sound if our suggested modifications are taken on board by the Inspector/Council.

West Hall Estate Company Ltd

Dear Tom,

#### Land at West Hall, West Byfleet

Further to your recent conversation with Bhavash Vashi of Strutt & Parker, I am writing to you to summarise the level of interest that we would gauge for a site of this nature in the current market, should it receive an allocation in the emerging Local Plan and associated planning permission.

The subject site extends to circa 74 acres (30 hectares) and we believe that there is a particularly strong demand for development in this area due to its highly desirable and sustainable location. The site lies within the London Commuter Belt and has strong rail connections and access to the M25. Its central location, coupled with its high environmental quality makes it an attractive place to live and work for local people and commuters.

Having been approached throughout the local plan promotion process by several parties, and having spoken with leading national and regional house builders active in the area, we have received confirmation from several parties that a site of this scale and nature would be highly desirable to their businesses, we would envisage strong interest in this site should it be marketed.

We have carried out research into the new homes sales market in the locality and concluded that there is a strong demand for new build family housing in this location and sales rates have continued to remain strong throughout the last few years, this is backed up by conversations with local agents operating in that market location who are in agreeance with our findings.

By way of a brief introduction, Strutt & Parker as of 2017 became part of BNP Paribas Real Estate, which is widely acknowledged as being one of the UK's leading property advisors across a broad spectrum of sectors, with 67 offices and 1,500 staff. Our specialist Development & Planning Teams are renowned nationwide and have an excellent track record in providing leadership during the planning process along with 'cutting-edge' acquisition and disposal advice for a wide variety of clients.

If you have any further questions, please do not hesitate to get in touch.

Yours sincerely,

Piers Beeton BA (Hons) MSc (Dev.Plan) MRICS Senior Associate Director – National Development & Planning Strutt & Parker

11 November 2019

Dear Mr Hickman

#### LAND AT WEST BYFLEET - PREVIOUSLY PART PMZ80

I refer to your recent enquiry regarding your land at West Byfleet shown on the attached plan.

You will recall that in 2004/5 Matthews & Son were instructed by your company to explore the possibility of extracting sand and gravel from this land. We then reviewed the viability of the land for mineral workings again in a further note to you dated 2 December 2015.

As part of our initial instruction, this firm contacted three separate companies in 2004/5 who were active or potentially active in the locality at that time.

One of those companies: Lafarge Aggregates, were sufficiently interested to carry out exploratory drilling on the site, resulting in the attached borehole information. You will see from the plan and the drilling logs that the investigation revealed that there was anticipated to be a thin deposit of sand and gravel of about 300,000 tonnes within your land although it is likely that this tonnage would have been significantly reduced further to allow for stand-off margins to the canal and other boundaries and from a number of isolated residential properties to the north and west of the site.

The mineral deposit is shown to be located in two separate areas (shown hatched) which would have been awkward (therefore more costly) to work and the gravel seam itself, where present, is also recorded as being disappointingly thin, varying between 1m and 2m with an

overburden thickness of between 0.5m and 1m. Such a deposit would result in higher losses during the working process than would otherwise be the case. Furthermore, the gravels in the Wey Valley are generally well known as being high in sand and silt content and therefore low in stone content which would also reduce the economic value of the mineral.

Such a deposit was clearly unappealing to Lafarge Aggregates in 2005 and they showed no further interest in pursuing the matter after their initial investigations (see attached). Similarly the other gravel companies who were approached showed little interest in pursuing the matter.

The lack of interest in the deposit at that time was clear evidence of the uneconomic nature of the deposit and in my view this mineral remains equally uneconomic to this day. The deposit is simply too small and has too many associated geological problems to be a commercially workable quarrying prospect. The current market for sand and gravel has changed little in recent years and in my opinion, the market would be most unlikely to show any future interest in this small and awkwardly placed sand and gravel deposit.

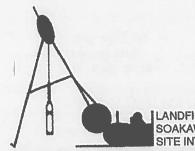

Removal of the gravel would also result in the need to backfill the land and this might have implications in terms of foundation design for any future development which would of course add to any overall development costs.

I trust the above information is of assistance and please do not hesitate to speak to me if you require further information.

Yours sincerely

#### Background

- 1.1 Tyler Grange Group Ltd (TG) have been appointed by West Hall Estate Ltd to support the continuing promotion of land surrounding West Hall, Parvis Road, West Byfleet. The land surrounding West Hall is currently identified for allocation under Site Reference GB10 in the emerging Site Allocation DPD for residential development and the provision of traveller pitches.
- 1.2 The provision of 15 traveller pitches has been a recent inclusion by the Council in the latest version of the emerging Site Allocation DPD. Strutt and Parker have continued to submit representations to the relevant Site Allocations DPD consultation stages. The accompanying Vision Statement includes an illustrative masterplan for the land at West Hall, including the potential location of a travellers site to the north east of West Hall. A copy of the illustrative masterplan is enclosed at Appendix 1.
- 1.3 Within the introduction of the emerging Site Allocations DPD the Council have set out the relevant policy context for traveller accommodation and make reference to the Traveller Accommodation Assessment (TAA) and findings of the Green Belt Boundary Review (GBR).
- 1.4 This in turn has led to proposals for two sites; Five Acres (Proposal Site GB2) and land surrounding West Hall (Proposal Site GB10) being proposed to be released from the Green Belt as they are identified as making a contribution towards meeting travellers' accommodation needs. The Council have also identified a number of sites which previously had the benefit of temporary planning permissions which are proposed to be permanent sites to reach the traveller pitch requirement of 27 between 2010-2027.
- 1.5 Beyond which the traveller pitch requirement increases by 11 pitches between 2027-2040. The emerging allocated sites are set out within draft Policy SA1: Overall policy framework for land released from the Green Belt for development.
- 1.6 The purpose of the report is two fold:
- To undertake a review of traveller sites (former, existing and potential) to assess their ability to accommodate further growth subject to Green Belt and landscape sensitivities against the Council's recommendations, and
- To undertake an alternative site specific assessment of land at the north east of land surrounding West Hall to

Plan 1: Site Location and wider Traveller Pitch Context (10096/P01)

- accommodate 15 traveller pitches in terms of Green Belt and landscape sensitivities
- 1.7 Plan 2 provides an illustrative layout of the alternative Traveller on Plan 1 Site Location and wider Traveller Pitch Context. Whilst sites considered for the provision of traveller pitches are illustrated The location of the site specific Green Belt review and review of Pitch on land north east of West Hall
- <u>-</u> to be heard in January 2020 reflect the forthcoming planning appeal for traveller use expected the north of Murrays Lane has been included within the review to At this point it is also worth noting that whilst not identified as a traveller site (former, existing or potential), land at Boyd Farm to
- 1.9 Where relevant consideration has also been paid to the findings of and to online planning records the Traveller Accommodation Assessment (TAA) (December 2013)

#### Methodology

- 1.10 Woking Council's Green Belt Boundary Review (GBBR) was areas of land suitable for housing and which could accommodate the land beyond the existing urban area within a view to identifying undertaken in 2013 with the final report being published in January beyond to 2040. Gypsy and Traveller sites for the plan period (up to 2027) and into 31 parcels of land. The purpose of the review was to review between Woking settlement boundary and the Borough boundary 2014 by Peter Brett Associates (PBA). The review divides the land
- 1.1 Since the publication of the GBBR national planning policy has remain the same: been updated. However, the five purposes of the Green Belt
- 1. To check the unrestricted sprawl of large built-up areas
- To prevent neighbouring towns merging into one another;
- 4. To preserve the setting and special character of historic towns To assist in safeguarding the countryside from encroachment;
- 5. To assist in urban regeneration, by encouraging the recycling of derelict and other urban land
- 1.12 For each Green Belt purpose four categories have been defined surrounding West Hall and the review of traveller pitches, where for the site specific assessment of land to the north east of land also outlined from paragraph 3.2.7 of the review which were used development. Parameters used to for defining the categories were be considered based upon that area's ability to accommodate against which the performance of assessment parcels may

- the landscape sensitivities have been undertaken.
- 1.14 In considering the Green Belt purposes, PBA clarified that in purpose was not considered within the GBBR and is therefore not be a town that has a particularly strong historical character. The considered in this assessment work respect of Green Belt Purpose 4 Woking is not considered to
- 1.15 In terms of Green Belt Purpose 5, PBA consider that it is considered within the GBBR as all land would score equally. to the fulfilment of this Purpose. Therefore, this Purpose is not impossible to judge how any given parcel of land would contribute
- 1.13 In addition to the findings of the Green Belt review consideration of 1.16 The assessment tables used within the GBBR are provided at Appendix 2.
- 1.17 For each parcel or Travellers Pitch assessed TG have also suitability criteria, where relevant considered the suitability of the parcel or site using the same

Plan 2: Illustrative Masterplan for the alternative Travellers Pitch on land north east of West Hall

# of Traveller Pitch Sites Section 2: Review

### Ņ Review of a former Traveller Pitch: Ten Acre Farm

## Site 1: Ten Acre Farm, Smarts Heath Road

The land at Ten Acre Farm was privately owned and according to the Traveller Accommodation Assessment (December 2013) had being suitable for traveller use despite formerly being accepted three authorised pitches. The Council does not identify the site as

#### **Landscape Designations**

2.2 The site is not affected by any landscape designations. Although it is noted the site is located adjacent to a Site of Special Scientific Interest, Smarts Heath Common Land

#### **Relevant Planning History**

- 2.3 The following online planning record is of relevance:
- PLAN/2017/1603 Redevelopment of former travellers site to provide new club building for Woking Gymnastics Club (part parking vehicular access and associate flood alleviation and two storey) with new public access, open space, cafe, car highway works - Permitted 28 September 2018.
- 2.4 Whilst permission has been granted for the redevelopment of the former travellers site conditions have yet to be discharged and works have not commenced on site
- 2.5 On reaching a conclusion, it is noted within the Committee Report at paragraph 132 that "The proposed development is inappropriate

Image 2a: Taken from Smart's Heath Road looking south into the site.

setting to the adjacent locally listed building. The NPPF requires substantial weight to be given to this harm." through the change in the character of the site and the harm to the is the loss of openness to the Green Belt, harm to some of the purposes of the Green Belt, harm to the visual amenity of the area The other harm resulting from the inappropriate development development in the Green Belt, which is by definition harmful.

The Report went on to state that very special circumstances are Green Belt and would justify a recommendation of approval for the considered to outweigh the substantial harm to be given to the

2.6

# Green Belt Boundary Review (GBBR) Findings

2.7 The site forms part of Parcel 17 which has a very low suitability for for Gypsy and Traveller use. However, the site is being proposed WOK003 and was considered potentially suitable for intensification removal from the Green Belt. It was assessed under site reference Gypsy and Traveller use for residential development and was not considered available for

## **Emerging Site Allocations DPD**

2.8 The latest Site Allocations DPD identifies the site for alternative development uses granted planning permission on site

#### built up areas Purpose 1: To check the unrestricted sprawl of large

#### Critical

2.9 west of the site is Smarts Heath and Prey Heaths SSSI, Commor undeveloped open land formerly known as Jackman's Nursery. To This parcel is adjacent to a residential area. Land to the east is Site of Nature Conservation Importance the south is Hoe Stream with a main railway line beyond. To the Land and to the south and west lies adjacent to the Hoe Stream

#### Purpose 2: To prevent neighbouring towns merging into one another

#### Moderate

2.10 The parcel is located between Woking and Guildford and comprises a much lager area than the site. Whilst the GBBR pitches would prevent towns from merging. As such, it is towns however it would not lead to settlements merging. It is that the land is part of a substantial gap between neighbouring considered that the rating for this purpose should be reduced to considered that some limited development, such as traveller considers the parcel's contribution to be 'Major' it is considered Moderate as it will not prevent in the merging of towns.

### Ņ Review of a former Traveller Pitch: Ten Acre Farm

Purpose 3: To assist in safeguarding the countryside from encroachment

- 2.11 The site has only been viewed from the north along Smarts Heath Road and from the west from within Smarts Heath Common Land from encroachment central part of the site is the best way of containing the countryside to the west. It is evident that by keeping development within the
- 2.12 The site has areas of grassland and areas of hard surfacing small buildings and areas previously subjected to fly tipping associated with the previous use of the site as a travellers site There are still derelict barns/buildings on site with abandoned
- 2.13 To the north west, Smarts Heath Road and existing vegetation trees to the west of the site which provide containment to the west for the existing vegetation to the south and substantial scrub and containment to the south and east. The same can also be said than the site) and associated vegetation assist with providing The Hoe Stream, main railway line (which is at a higher level view of the northern part of the site through existing vegetation form the boundary. As image 3a demonstrates there are glimpsed
- 2.14 Despite aerial images showing vegetation along the eastern which would need to be replace to contain the site to the north boundary, there has been removal of tree screening to the north

Image 2b: Taken from within Smarts Heath Common to the west of the site.

#### **Boundaries**

- 2.15 The parcel does not lie adjacent to an existing inset area, so any into the Green Belt. Green Belt release would result in the creation of a new area inset
- 2.16 Whilst it is considered that the site does have a relatively strong is existing vegetation to the north of the site there has been and east, it is clear that despite aerial images showing that there removal of tree screening to the north of the site which would need level containment through existing boundaries to the west, south
- 2.17 In considering the former traveller use and recent consent for a gym, the intention is for the site to be retained within the Green strong wooded buffer to the west of the site and Smart's Heath Road to the north with Smarts Heath Common land to the west which has a relatively south and east of the site represent a defensible boundary along release. Tyler Grange would argue that the railway line to the Belt with no clear defensible boundaries being identified for its

#### Summary

disagree that the site is not suitable for gypsy and traveller use From a landscape and Green Belt perspective Tyler Grange been granted for a gymnasium, there is no reason why the site traveller pitches. Whilst it is noted that planning permission has It is evident from its previous use that the site was suitable for

> south and east and the existing tree boundaries of the Smeath include Smart's Heath Road to the north, the railway line to the the Green Belt could be justified. New defensible boundaries could the Green Belt, it is considered that in time a wider release from Whilst the Council and GBBR consider the site should remain in Heath Common Land to the west of the site.

could not have been used for traveller pitches again.

N

## Site 2: Land South of Murrays Lane

2.18 Land south of Murrays Lane is privately owned and is identified by the Council as having in principle support for permanent pitches.

#### **Landscape Designations**

2.19 The site is not affected by any landscape designations

#### **Relevant Planning History**

- 2.20 The following online planning records are of relevance
- subject to S106 Agreement. PLAN/2018/1072 Section 73 application for the removal of planning permission PLAN/2016/0164 - Permitted 10 May 2019 condition 01 and variation of condition 02 to make permanent
- COND/2016/0070 Discharge of conditions relating to PLAN/2016/0164 - Permitted 28 September 2016.
- to four pitches for an extended Romany Gypsy family with PLAN/2016/0164 3 year temporary change of use of land associated works - Permitted 12 May 2016
- PLAN/2015/0903 Change of use of land to four pitches for residential accommodation with associated works - Refused
- 2.21 It is noted that temporary permission was granted in view of personal circumstance of the applicant and on a temporary basis

- 2.22 In considering the latest application the Committee Report noted is considered to make a slight/negligible contribution Green Belt dimensional structure. However the site is located in an area that that the openness of the Green Belt is eroded by any three purposes (a. restricting the sprawl of large built up areas and b. preventing neighbouring towns merging)
- 2.23 The site was considered to lie within a fragmented urban fringe is a public right of way flanked by a trees. Overall the site was visible from Murrays Lane (PRoW). considered to have a high degree of spatial containment, but is tress/woodland. The northern boundary is Murrays Lane which field is well contained on the eastern side by a strong tree belt of from the wider land to the west by the M25. The wider triangular landscape on the south west edge of Byfleet which is separated
- 2.24 Whilst there would be harm to the openness of the Green Belt, weight to a limited degree, against this harm. development to is surrounding and screening views from Murrays planting on site has assisted to a degree with the integration of the Lane. Accordingly the Committee Report considered these factors
- 2.25 In considering each of the Green Belt purposes and drawing to a clearly outweighed by other considerations. harm to openness which would result from development, would be Green Belt, including harm by reason of inappropriateness and conclusion the Committee Report considered that the harm to the

mage 3: Taken from north east corner of the site off Murrays Lane

# Green Belt Boundary Review (GBBR) Findings

2.26 The site forms part of GBBR Parcel 6 which was assessed as and 3 with a high suitability for land as an area of search. having slight/negligible importance to Green Belt Purposes 1, 2

## **Emerging Site Allocations DPD**

2.27 Emerging Policy SA1 (Overall policy framework for land released of Murrays Lane to be granted permission in principle for the from the Green Belt for development) identified Land to the south permanent use of the site for a specified number of pitches.

- From a landscape and green belt perspective TG agree with conclusions regarding the Green Belt the permanent consent for 4 traveller pitches at the site and the findings of the GBBR and Committee Report relating to
- Belt Purposes and is suitable for traveller pitches The site has slight/negligible importance to the first three Green
- pitches is in accordance with emerging Site Allocations Policy SA1. The granting of planning permission for the permanence of the
- only, and there are high voltage electricity cables crossing the Whilst it is appreciated the permission is for one extended family location if required in the future. site, it is evident that there could be potential for expansion at this

# Site 3: Boyds Farm, Murrays Lane, Byfleet

2.28 Land at Boyds Farm to the north of Murrays Lane has not been considered within the GBBR for gypsy and traveller use or within the emerging Site Allocations DPD. The site is privately owned and is subject to a planing appeal for gypsy / traveller use.

#### **Landscape Designations**

2.29 The site is not affected by a landscape designation

#### **Relevant Planning History**

- 2.30 The online planning records for the site includes an application (Ref. PLAN/2018/0940) for the change of use of land to two gypsy/traveller pitches including two mobiles homes, two semi detached day-rooms, 1 package treatment plant, two touring caravans, hard standing and associated works. The application was refused on 8 November 2018 on three grounds.
- 2.31 In summary, the reasons for refusal are 1. inappropriate development in the Green Belt, 2. detrimental impact on the open and rural character and appearance of the site and 3. lack of a legal agreement. The delegated officers report states that it had not been demonstrated that the proposed occupiers fall within the definition of gypsies and travellers defined within the Planning Policy for Traveller Sites (PPTS).
- 2.32 It is understood that an appeal hearing is scheduled to take place in January 2020.

# Green Belt Boundary Review (GBBR) Findings

- 2.33 The site forms part of GBBR Parcel 5 Area B. Parcel 5 was assessed as having slight/negligible importance to Green Belt Purposes 1, 2 and 3 with a high suitability for land as an area of search. The land makes little contribution to Purpose 1 with existing boundaries poorly defined. The review identifies that the M25 forms a clear boundary, both physically and visually, between Blyfleet and the Green Belt land to the west of the M25.
- 2.34 In terms of Purpose 2 existing urban areas are separated by the M25 and existing vegetation. Existing development is identified as having a strong influence over the area and as a result the parcel makes little contribution to Purpose 3.
- 2.35 The GBBR recommends land within Parcel 5 Area B to be removed from the Green Belt as it contributes little to Green Belt purposes and boundaries are poorly defined. There are existing constraints which include overhead power lines, noise and accessibility issues that appear to prevent development.

## **Emerging Site Allocations DPD**

2.36 The site is not referenced within the latest version of the Site Allocations DPD.

#### Summary

The site is privately owned and whilst an application has beer refused for traveller use, the applicants are actively pursuing

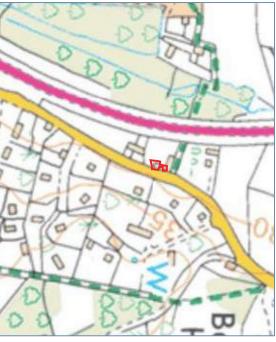

Image 4: Taken from Murrays Lane looking north into the site.

the use through a planning appeal demonstrating the need for the site. Given that the site forms part of an existing field it could be possible to intensify the traveller use on the site in the future, if necessary.

- The site has slight/negligible importance to the first three Green Belt Purposes and is suitable for traveller pitches. The site lies within the extents of the existing built edge to the north and east and is visually contained by mature tree belts and vegetation. Views into the site are largely limited to those glimpsed from the existing gated access into the site from the south (see image 4). The M25 to the west, existing settlement to the north and east and Murrays Lane detract from the rural and tranquil nature of the site.
- Furthermore, as previously identified land to the south of Murrays Lane benefits from consent for four traveller pitches which reflects the acceptability of traveller uses in this location
- Due to the enclosed nature of the site, its proximity to the existing traveller pitches to the south of Murray Lane and the negligible importance the site makes to the Green Belt it is considered that the site is suitable for gypsy and traveller use and should be released from the Green Belt in accordance with the findings of the GBBR.

N

# Site 4: Land at Stable Yard, Guildford Road

2.37 Land at Stable Yard, Guildford Road is a privately owned travellers for a permanent pitch site and is identified by the Council as having in principle support

#### **Landscape Designations**

2.38 The site is not affected by any landscape designations

## **Relevant Planning History**

- 2.39 The following online planning records are of relevance:
- PLAN/2018/0804 Retention of residential use of the land contained residential units - Granted 18 October 2019, and for the stationing of two mobile homes occupied as self
- south of Stable Yard for one gypsy family Refused 24 PLAN/2013/0828 Stationing of 2 no. mobile homes on land and 2218561) on 6 August 2015. January 2014. Proposal allowed at appeal (Ref. 2222292
- 2.40 It is noted that in allowing the previous appeal the Inspector that the site is well screened from the public right of way to the provides an effective visual barrier. The Inspector also found behind high, dense screen of well established hedging which north of the site and from the A320 to the west. At most the considered that the area where the mobile homes are set

There is substantial The site is enclosed by a timber fence on all fours boundaries properties the site is only visible from Blanchards Hills via the the views from Sutherland Avenue to the south. Due to the
- south and potential coalescence between Sutton Green and a detrimental impact on the openness of the Green Belt to the land south of Gabriel Cottage is suitable for one pitch only. From a landscape and Green Belt perspective it is agreed that There is no opportunity for expansion at the site without having Jacobs Wells which forms part of Guildford.
- Whilst the site is considered to have a major importance to the Traveller Pitches by virtue of very special circumstances. first three Green Belt Purposes it is only considered suitable for
- permission in principle will be granted for the permanent use of the emerging Site Allocations Policy SA1 does indicate that Despite the latest planning application pending determination, site for 1 pitch.

# Site 6: The Hatchingtan (& The Oaks), Burdenshott Road

- 2.52 The Hatchingtan site is publicly owned and managed by Surrey County Council. According to the Council's Traveller Accommodation Assessment, December 2013 the site has 16 authorised pitches.
- 2.53 Whilst not within Woking District, on the adjacent side of the road, is The Oaks which is another site managed by Surrey County Council which also has 16 authorised pitches.

#### **Landscape Designations**

2.54 The site is not affected by any landscape designations

## **Relevant Planning History**

2.55 The Hatchingtan online planning history includes consultation from Surrey County Council (Ref. PLAN/2010/0646) for the remodelling of the existing traveller site by removal of two existing pitches and associated utility block and laying out of two replacement pitches and construction of a new utility block

# Green Belt Boundary Review (GBBR) Findings

2.56 The site is not within a GBBR Parcel but is included under site reference WOK002 within Appendix E as a rejected Gypsy & Traveller site. The reason for rejection is due to the fact the site

is an existing Gypsy and Traveller site which is not suitable for further pitches, as it is within Flood Zone 3 and Zone A of the Thames Basin Heaths Special Protection Area.

## **Emerging Site Allocations DPD**

2.57 The site is not included within the emerging Site Allocations DPD.

- The site is an existing publicly managed travellers site which is at maximum capacity when considering the maximum size requirements, which ideally should not exceed 15 pitches, as published by Government.
- From a landscape and Green Belt perspective it is agreed that no further intensification or growth of the The Hatchingtan site should take place as it is considered to result in a critical-major importance to the first three Green Belt purposes and for this reason should not be expanded.
- In addition the site is not considered suitable for growth due to the existing environmental constraints.

N

# Site 7: Five Acres Farm, Brookwood Lye Road

2.58 Five Acres is a privately owned travellers site. According to the the site has 13 permanent pitches plus two temporary pitches. The Council identify provision for an additional 6 pitches at Five Acres Council's Traveller Accommodation Assessment, December 2013

#### **Landscape Designations**

The site is not affected by any landscape designations

## **Green Belt Boundary Review (GBBR)**

3.6

- The site forms part GBBR Parcel 6. More specifically, the land suitable for removal from the Green Belt sustainability credentials part of the site has been considered of landscape character and sensitivity. However, due to its high as having 'very low' suitability for removal from the Green Belt. It was considered to have little or no capacity for change in terms parcel was assessed as part of a larger land parcel, ref. WGB004
- the adjacent plan and is assessed under parcel ref. WGB006. This boundary to the Green Belt and to conserve the landscape setting. site parcel which forms part of GBBR Parcel 6 was accepted as a The identified land for removal from the Green Belt is shaded on allows for significant areas of landscaping to create an appropriate development. However, it was concluded that parcel ref. WGB006 neighbour parcel WGB004), and low potential for sustainable high suitability for removal from the Green Belt (a contrast to its during the stage 2 Green Belt review. It was considered to have preferred parcel for further investigation for strategic development

Our assessment has reviewed the land parcel to the north west of proposed traveller pitches for emerging Proposal Site GB10. It has the entrance to West Hall as a potential alternative location for the and considers the following: been assessed in respect of the first three Green Belt purposes

#### built up areas Purpose 1: To check the unrestricted sprawl of large

#### Slight/Negligible

3.9 as being suitable for Green Belt release within the GBBR. It is This parcel is adjacent to the A245 and existing residential development to the north which forms part of West Byfleeet. It considered that there are opportunities for enhancement and also adjoins land to the west and south which is already identified definition of the Green Belt boundary in this location.

#### Purpose 2: To prevent neighbouring towns merging into one another

#### Negligible

- 3.10 The parcel does not sit directly between two towns. There are strong, well defined boundaries, to the east of the site, namely Old Wood and the M25 corridor which would prevent West Byfleet
- 3.11 There is no intervisibility from the site to Byfleet and restricted

# Review of land to the north west of West Hall, West Byfleet

ယ

of openness would not be perceived as reducing the gap between additional planting along the northern boundary of the site. Loss Glimpsed views to the north of the site would be lost through the settlements in this location given its relationship to the wider visibility of West Byfleet due to Tins Wood to the west of the site land already identified to be removed from the Green Belt.

# Purpose 3: To assist in safeguarding the countryside

from encroachment

- 3.12 The parcel consists of a pasture field used for the grazing and existing vegetated boundaries and nearby surrounding woodlands ability to assist in fulfilling this Green Belt purpose. Due to the are degraded by horsiculture. Land to the west and south of the exercising of horses adjacent to the existing settlement edge. It intervisibility between the parcel and surrounding countryside is considered that the site has semi rural characteristics which the site already has a high level of containment which also limit field is identified for Green Belt release which diminishes the sites
- 3.13 The eastern boundary of the site would need enhancement there are no views of the parcel from the wider countryside and as lane and Old Wood further restricts views from the east. Therefore west or south. There are existing trees on the opposite side of the people travelling along the lane and is not visible from the north, to contain and limit visibility between the parcel and the lane. However it is important to note that this view is only applicable to

Image 11b: The eastern boundary of the site would need enhancement given the visibility of the site between existing trees

such the parcel is contained

#### **Boundaries**

- 3.14 The parcel is adjacent to an existing area identified for Green Belt release and is adjacent to the existing settlement edge. release. As recognised by the Woking Council's GBBR the land TG consider that it would be a logical extension for Green Belt has high suitability as an area of search for development.
- 3.15 It is considered that the additional parcel does not perform any critical or major Green Belt purposes and through additional without any harm to the Green Belt or wider landscape enhancement along the eastern boundary has capacity to change
- 3.16 The existing planting and location of the A245 provide a defensible boundary to the north. Tins Wood to the west and existing term. Plus further to the east is Old Wood and the M25 corridor Green Belt boundaries which serve as strong defensible boundaries and recognisable likely there will be residential development to the south in the long vegetation to the south provide a clear boundary although it is

## Harm to Green Belt Resulting from Release

## Contribution of parcel to Green Belt purposes

3.17 The parcel is adjacent to a wider parcel of land identified for release. The parcel overall is considered to have a negligible

contribution to the first three Green Belt purposes

3.18 In addition to its location adjacent to the wider land parcel an urbanising influence. and M25 (to the east) detracts from the overall rurality of the area identified for release, the presence of both the A245 (to the north) To a lesser degree, the existing settlement edge to the north has

#### of the wider Green Belt Implications of the loss of openness within the parcel on the integrity

- 3.19 The effects of development within the parcel would be localised contained from the surrounding area to within it's boundaries. Intervisibility within the parcel is limited to glimpsed views from the north and east for receptors using the lane. Aside from the views from the lane, the parcel is visually
- 3.20 The parcel's release from the Green Belt would not have an adverse impact on the integrity of the wider Green Belt

#### Strength of parcel boundaries

3.21 The A245, Tin Wood and the unnamed lane are considered to be strong new Green boundaries in addition to new planting to the contained by a set of robust boundaries which would constitute clearly defined and readily recognisable. The parcel is therefore

# 3 Review of land to the north west of West Hall, West Byfleet

#### Potential harm to the Green Beli

3.22 Considering the above factors and their combined relationship, judgement has been made that the site has a high suitability for Green Belt release, especially given its location adjacent to the wider area identified for Green Belt release in this local area.

# **Potential Mitigation and Boundary Enhancements**

3.23 The measures outlined below are specific to the circumstances of the parcel and could be considered as part of the development process. They are to be read alongside the adjacent Mitigation and Enhancement Plan.

# <u>Strengthen boundary at weak points and use landscaping to help integrate new Green Belt boundary</u>

As illustrated in Image 1a, the southern boundary comprises a mixture of hedgerow and hedgerow
trees which will form a new Green Belt boundary with land further west and to the south west already
being identified for removal from the Green Belt to deliver the proposed residential development
at West Hall. Where there are weak points along the southern boundary additional tree and hedge
planting, which are a typical boundary in the landscape, should be strengthened.

# Define Green Belt edge by strengthening existing boundary and creating a new boundary to the south of the proposed traveller site.

2. The parcel's eastern boundary comprise post and rail fencing and a tree boulevard along the unnamed lane that provides access to West Hall Care Home, local businesses and nine residential properties. Whilst there is some self seeded under-storey growth along some parts of the lane, there is a need to strengthen planting along the eastern and parts of the northern boundary to create a better visual barrier between the land parcel and the adjacent pasture field, particularly where the travellers site is proposed.

Whilst it is considered a wider parcel release could be achieved in this location, the proposed traveller pitch is enclosed to a smaller parcel with the planting of a new hedgerow and the southern part of the parcel being provided for ecological/biodiversity enhancements.

## Ecological/Biodiversity Enhancements

In conjunction with recommendation 1 above, there are opportunities to incorporate ecological enhancements within the southern part of the field. It is considered that a mosaic of species rich grassland and shrub planting could be provided which would maintain an element of visual openness should the parcel not be removed from the Green Belt.

## Enhance access within the Green Belt

4. Whilst there are currently no public rights of way across the site, there are unadopted paths within Old Wood to the east which could link up to the site and wider West Hall development. There are opportunities to integrate new footpaths within development to connect with the existing PRoW network and therefore improve access to the surrounding Green Belt and countryside.

#### Mitigation and Enhancement Plan

- The parcel comprises a relatively flat pasture field which is used for horsiculture.
- The parcel makes a Negligible contribution to the first three Green Belt purposes
- It has been assessed that the parcel has high suitability for Green Belt release and would not result in harm to the wider Green Belt given its location adjacent to larger land parcel identified for release and existing boundaries which restrict visibility of the site from the surrounding area.
- Whilst the proposal would result in spatial encroachment of the countryside, the A245 to the north and the M25 further east already serves as a major urbanising influence which detracts from the parcel's rurality.
- Subsequent to the parcel's Green Belt release, there are opportunities for the proposal to provide enhancements to the eastern boundary and integrate areas of open space and provide habitat improvement.

 $\frac{1}{2}$ 

# Section 4: Summary and Conclusion

## 4 Summary and Conclusion

- 4.1 The purpose of this report was two fold
- To undertake a review of traveller sites (former, existing and potential) to assess their ability to accommodate further growth subject to Green Belt and landscape sensitivities against the Council's recommendations, and
- To undertake an alternative site specific assessment of land at the north east of land surrounding West Hall to accommodate 15 traveller pitches in terms of Green Belt and landscape sensitivities.
- 4.2 It is evident from the work undertaken and from the illustrative masterplan that the travellers pitches could be delivered at the alternative location alongside the emerging allocation for Proposal Site GB10 as a separate standalone traveller site with its own access. The summary and conclusion of this report are set out under the appropriate sub headings below.

#### Traveller Pitch Provision

- 4.3 A review of the traveller pitch provision was undertaken and the following summary points are provided:
- Land at Ten Acre Farm was previously authorised for three traveller pitches. From a landscape and Green Belt perspective TG disagree with the Council that the site is not suitable for gypsy and traveller use. It is evident from its previous use that the site was suitable for traveller pitches. Whilst it is noted that planning permission has been granted for a gymnasium, there is no reason why the site could not have been used for traveller pitches again.

It is considered that in time a wider release from the Green Belt could be justified. New defensible boundaries could include Smart's Heath Road to the north, the railway line to the south and east and the existing tree boundaries of the Smeath Heath Common Land to the west of the site.

- Land south of Murrays Lane: Planning permission has been granted for four pitches for an extended family to live on the site. The site has been granted planning permission in the Green Belt as it was considered that any harm by inappropriateness would be outweighed by other considerations. TG agree with the delivery of permanent pitches from a landscape and Green Belt perspective. It is considered that there is potential for additional pitches at this location, if needed by the family. The recent permissions are in accordance with emerging Site Allocations Policy SA1.
- Land at Boyd Farm, north of Murrays Lane: Whilst an application has been refused for traveller use, the

- applicants are actively pursuing the use through a planning appeal demonstrating the need for the site. TG agree with the findings of the GBBR in that the parcel makes little contribution to the Green Belt purposes and should be released from the Green Belt. Due to the proximity to the four traveller pitches on land south of Murrays Lane it is considered that the site is suitable for gypsy and traveller use.
- Land at Stable Yard: The Council identified the potential for one permanent pitch, yet panning permission has been granted the retention of residential use for two traveller pitches. Whilst the site is considered to be of major importance to the first three Green Belt purposes very special circumstance were considered to outweigh any harm to the Green Belt. TG agree with the recent decision of the Council and do not recommend any further pitches should be provided in this location from a landscape and Green Belt perspective. The recent permission is in accordance with emerging Site Allocations Policy SA1.
- Land south of Gabriel Cottage: The site is enclosed
  on all boundaries and is only visible through the open
  gates onto Blancards Hill. Whilst planning permission has
  been granted with very special circumstances, there is no
  opportunity for expansion at the site without detrimental
  impact on the openness of the Green Belt. TG agree with the
  recommendations of the Council from a landscape and Green
  Belt perspective.
- The Hatchingtan: The existing traveller site is publicly owned and is maximum capacity. The site is not considered suitable for expansion due to further harm on the Green Belt and its location within Flood Zone 3 and Zone A of the Thames Basin Heaths Special Protection Area. TG agree with the Council from a landscape and Green Belt perspective.
- Five Acres Farm: A current application is pending determination for a replacement caravan park for 19 permanent pitches, increasing the existing number of pitches by 4 additional pitches. Whilst the decision is pending, the application for 19 pitches is in accordance with emerging Site Allocations Policy GB2. As the land adjacent to the site is identified for Green Belt release, it is considered that the land at Five Acres Farm should also be included for release to deliver a new defensible Green Belt boundary. TG agree with the Council's recommendations from a landscape and Green Belt perspective.
- Land north of Saunders Lane: The site is located within
  a defined escarpment and rising ground of landscape
  importance. It is also located within the Green Belt and

adjacent to Hook Heath conservation area. Whilst the southern part of the site is considered to be notably discreet and therefore could be developed to accommodate pitches, if required.

It is also recommended that gypsy and traveller use should be considered as part of the land intended for allocation for residential development under Site Proposal GB7 (Nursery Land adjacent to Egley Road, Mayford).

Land at New Lane, Sutton Green: Has been identified as being suitable for gypsy/traveller use in the GBBR. Yet it was refused planning permission for two traveller pitches in 2018. Given that the site is well screened on all sides of the site and that through additional planting and a sensitive layout permission could be granted for gypsy/traveller use. This site has not been included within the Site Allocations DPD.

# Alternative location at land north east of West Hall

The site specific assessment of land to the north east of land surrounding West Hall demonstrates that the land makes a slight contribution to the first three Green Belt purposes which is also reflected in the GBBR.

4.4

- 4.5 It is considered that the location of gypsy and traveller pitches to the north of the parcel would be screened by Tins Wood to the west, existing vegetation to the north parallel to the A245. The gypsy and traveller pitches would only be visible along the unnamed lane to the east of the site which could be screened by additional planting along the eastern boundary of the site. However it must be remembered that Old Wood further to the east and the M25 limit views of the site from the east and as shown in image 1 and the aerial image of the site there is existing vegetation to the south which filter visibility of the site.
- 4.6 If the land to the north of the site is released for gypsy and traveller pitches, ecological enhancements are proposed on the southern part of the site. The parcel has high suitability for Green Belt release and through the proposed mitigation and enhancements recommended would not result in harm to the wider Green Belt.

#### Conclusion

4.7 It is evident that since the publication of the TAA in December 2013, a number of gypsy/traveller pitches have been granted planning permission subject to very special circumstances which have been considered to outweigh harm to the Green Belt. It is considered that if development is not forthcoming for the gymnasium at Ten Acre Farm that there is no reason why gypsy/ traveller pitches could not be provided on the site in the future.

## Summary and Conclusion

- 4.8 Whilst the upper limits of land north of Saunders Lane is not considered appropriate for gypsy/traveller use due to the site's location within the escarpment and rising ground of landscape importance and the importance of the sites role in fulfilling the first three purposes of the Green Belt, the lower limits of the site could accommodate traveller pitches if required. It is also considered Nursery Land adjacent to Egley Road should be considered for gypsy/traveller use as part of emerging Site Proposal GB7.
- 4.9 Land at New Lane, Sutton Green is considered to be suitable for gypsy/traveller use albeit any future application will need to demonstrate site specific, very special circumstances and supported by robust evidence for Green Belt release. It is considered that the site could accommodate a minimum of 2 traveller pitches.
- 4.10 Land at Boyds Farm to the north of Murrays Lane has not been considered for gypsy and traveller use in the GBBR or the emerging Site Allocations DPD. Yet there is a clear demand for the traveller use through the pending appeal hearing. The GBBR establishes that the land is within a parcel identified for Green Belt release and given its proximity to the approved traveller use on land to the south of Murrays Lane, it is considered that the site should be released for traveller use with potential for intensified traveller use in the future.
- 4.11 Overall, it is clear that number of traveller pitches required at West Hall could be reduced if due consideration was given to the other aforementioned sites within Woking.
- 4.12 It is has therefore been identified that the alternative parcel of land could be released from the Green Belt alongside the allocation of land surrounding West Hall (Policy GB10) to provide a standalone traveller site that would include a defensible and robust new Green Belt boundary and offer opportunities for access from the allocatec site to the wider Green Belt and the management of land retained in the Green Belt for ecological enhancements. This would meet the requirements of paragraph 136 of the NPPF and the NPPG to offset harm associated with the removal of land form the Green Belt.

2

## **Appendix 2: GBBR Methodology**

As detailed in the introduction, TG have used the GBBR methodology and for ease of access the following tables below are an extract of the criteria assessment used to assess the performance of the parcels in respect of Green Belt Purposes 1 - 3.

by co		Green Belt of no	town.
encr	None	Continued inclusion within	<ul> <li>Land is largely contained by existing development and already forms part of, and is perceived as, part of the</li> </ul>
which		No importance to Green Belt	Land where development would have <b>no</b> impact on this purpose of Green Belt.
Retention		Green Belt of minor/negligible importance	<ul> <li>Development may allow opportunities for enhancement of degraded land and the definition of a stronger long-term Green Belt boundary.</li> </ul>
Green	Slight/ Negligible	Green Belt Purpose Continued inclusion within	<ul> <li>Intellated is physically and visually dominiated by/retailed to the town and already perceived to be part of/or closely related to the urban area, giving a poorly defined edge and possibly the perception of 'sprawf'.</li> </ul>
* NOTE: T		Slight/Negligible importance to	Land where development would have limited/negligible impact on this purpose of Green Belt.
disceri		Green Belt of moderate importance	and therefore contribute less to the jurpose (other land closer to the urban edge performs the function of containment).
