AFFORDABLE HOUSING PROVISION: IMPLEMENTATION OF POLICY CS12 FOLLOWING THE INTRODUCTION OF NEW NATIONAL AFFORDABLE HOUSING THRESHOLD AND VACANT BUILDING CREDIT.

NB. The revised versions of the National Planning Policy Framework produced in July 2018 and February 2019 both state 'Provision of affordable housing should not be sought for residential developments that are not major developments...' (*Paragraph 63*), with major developments for housing defined as 'development where 10 or more homes will be provided, or the site has an area of 0.5 hectares or more' (*Glossary*).

Woking Borough Council is now applying these thresholds, as the most upto-date policy. Guidance below that relates to the former national thresholds between 10 and 11 dwellings, and 1000m2 gross floorspace, should therefore be read as relating to the new national thresholds between 9 and 10 dwellings, and 0.5 hectares site area, respectively.

May 2019

## When and how much affordable housing is required?

In 2014 the Government consulted on a proposed change to the threshold for affordable housing contributions so that only developments of over 10 dwellings, or more than 1,000 square metres of gross floorspace, would be liable for affordable housing contributions through Section 106 agreements. The Government considers that this will assist in the delivery of housing on small-scale sites and previously developed (brownfield) land.

The results were published by the Department for Communities and Local Government (DCLG) and a Ministerial Statement was issued in November 2014 introducing the new threshold for affordable housing contributions as set out above. In addition, a "vacant building credit" can now be offered to developers to incentivise them to develop sites. This applies where vacant buildings are proposed to be brought back into lawful use or demolished and redeveloped. This does not apply to buildings which have been abandoned. DCLG subsequently provided clarification as to how the vacant building credit might function, in correspondence in January 2015. These changes have also been reflected in updates to the national planning practice guidance (NPPG).

As a result of these changes, the following provides guidance on how Woking Core Strategy Policy CS12 will be implemented by the Council in light of the new affordable housing threshold and how the Council will apply the vacant building credit.

# **Affordable Housing Provision**

In taking account of the change to the NPPG as a material consideration, the Council will no longer require affordable housing or affordable housing financial contributions for sites of less than 11 dwellings unless more than 1,000 square metres of new gross internal floorspace is proposed.

 Where more than 1,000 sq.m gross floorspace is proposed for sites of less than 11 units, the Council will require affordable housing provision or a contribution in line with Policy CS12:

- an equivalent financial contribution to 10% of the units being affordable where a scheme proposes 1-4 net additional dwellings;
- 20% of the units to be affordable or an equivalent financial contribution (to be determined on a case by case basis), to be made where a scheme proposes 5-9 net additional dwellings;
- 30% of the units to be units to be affordable or an equivalent financial contribution to be made where a scheme proposes 10 net additional dwellings.
- On sites providing between 11 and 14 dwellings, the Council will require 30% of the dwellings to be affordable.
- On sites providing 15 or more dwellings the Council will require 40% of the dwellings to be affordable.
- On sites of over 0.5 ha where more than 10 dwellings or 1,000 sq.m gross floorspace is proposed, the Council will require 40% of the dwellings to be affordable.
- On greenfield sites and sites in public ownership, where the development is more than 10 dwellings or more than 1,000 square metres of gross floorspace, the Council will require 50% of the dwellings to be affordable.

All other parts of the adopted Policy CS12 will remain as before.

Please note that the implementation of the new national threshold for Affordable Housing contributions does not alter a development's liability to the Community Infrastructure Levy (CIL). The only impact in this sense will be a positive effect upon development viability of schemes of 10 or fewer dwellings or under 1,000 sq.m gross floorspace. For more information about CIL, see http://www.woking.gov.uk/planning/service/contributions.

### **Vacant Building Credit**

In November 2014 the Government (the Department for Communities and Local Government) introduced a "vacant building credit" that could be offered to developers to incentivise them to develop brownfield sites. This credit applies where vacant buildings are proposed to be brought back into lawful use or demolished and redeveloped. This does not apply to buildings which have been abandoned. DCLG subsequently provided revisions in an update to the <u>national planning practice</u> guidance (NPPG) in February 2015.

#### The NPPG states:

"under national policy where there is an overall increase in floorspace in the proposed development, the local planning authority should calculate the amount of affordable housing contributions required from the development as set out in their Local Plan. A 'credit' should then be applied which is the equivalent of the gross floorspace of any relevant vacant buildings being brought back into use or demolished as part of the scheme and deducted from the overall affordable housing contribution calculation."

As a result of these changes, the following provides guidance on how the Council will apply the vacant building credit.

# Calculating the vacant building credit

The existing vacant gross internal area (GIA) of any buildings proposed to be brought back into lawful use or to be demolished and redeveloped, will be calculated as a

percentage of the proposed total GIA, leaving the net increase in floorspace. The required percentage of affordable housing will then be applied only to the net increase in floorspace.

Where the 'vacant building credit' is applicable, it will be calculated as follows:

Existing vacant floorspace is A sq.m

Proposed total floorspace of new development is **B** sq.m

Net increase in floorspace (B - A) is **C** sq.m

Requirement under Core Strategy Policy CS12 Affordable Housing is **D** dwelling units

To apply the Vacant Building Credit to give a reduced Affordable Housing requirement (**E**):

For clarity, a worked example is shown below:

Existing vacant floorspace is 300 sq.m (A)

Proposed total floorspace of a mixed use development providing 40 dwelling units is 2,400 sq.m (B)

Net increase in floorspace (2,400 sq.m. - 300 sq.m) is 2,100 sq.m (C)

Requirement under Core Strategy Policy CS12 Affordable Housing is 16 dwelling units (D)<sup>1</sup>

To apply the Vacant Building Credit to give a reduced Affordable Housing requirement (E):

# $\frac{2,100 \text{ (C)}}{2,400 \text{ (B)}} \times 16 \text{ (D)} = 14 \text{ Affordable Homes (E)}$

Please note that the onus will be on the Applicant to demonstrate to the satisfaction of the Local Planning Authority a building's vacancy and to provide accurate GIA floorspace measurements.

#### Definitions

For the purposes of applying the vacant building credit, the following definitions will apply:

Existing building – a permanent structure with a roof and walls, which is present on the site during assessment of the planning application by the Local Planning Authority (the Council). This definition excludes open-sided structures and buildings into which people do not normally enter or only enter intermittently for the purposes of inspecting

<sup>&</sup>lt;sup>1</sup> Policy CS12 requires a development of 40 dwellings to make 40% provision for Affordable Housing, which is 16 units.

or maintaining fixed plant or machinery. No discount will be given for sites that have already been cleared of any such buildings, those in an advanced state of dereliction or to abandoned buildings.

Vacant – to be considered vacant, a building shall not have been in continuous use for a period of at least 6 months within the 3 years ending on the day the planning application is made valid. Council tax and rates records may provide evidence when determining if a building is vacant.

Abandoned – for the purposes of applying the vacant building credit, a building will be treated as 'abandoned' rather than 'vacant' where the lawful planning use of the building has been abandoned for a period of five years. Cessation of a use does not necessarily equate to abandonment.

Gross Internal Area (GIA) – the GIA is the area of a building measured to the internal face of the perimeter walls at each floor level. It includes:

- Areas occupied by internal walls and partitions
- Columns, piers, chimney breasts, stairwells, lift-wells, other internal projections, vertical ducts, and similar
- Atria and entrance halls, with clear height above, measured at base level only
- Internal open-sided balconies, walkways, and similar
- Structural, raked or stepped floors are property to be treated as a level floor measured horizontally
- Horizontal floors, with permanent access, below structural, raked or stepped floors
- Corridors of a permanent essential nature (e.g. fire corridors, smoke lobbies)
- Mezzanine floor areas with permanent access
- Lift rooms, plant rooms, fuel stores, tank rooms which are housed in a covered structure of a permanent nature, whether or not above the main roof level
- Service accommodation such as toilets, toilet lobbies, bathrooms, showers, changing rooms, cleaners' rooms, and similar
- Projection rooms
- Voids over stairwells and lift shafts on upper floors
- Loading bays
- Areas with a headroom of less than 1.5m
- Pavement vaults
- Garages
- Conservatories
- Basements

### The GIA excludes:

- Perimeter wall thicknesses and external projections
- External open-sided balconies, covered ways and fire escapes
- Canopies
- Voids over or under structural, raked or stepped floors
- Domestic greenhouses, garden stores, fuel stores, and similar

This note clarifies guidance provided in Woking Borough Council's Affordable Housing delivery supplementary planning document (SPD) in light of national planning policy and guidance changes. The Affordable Housing Delivery SPD is
